## Re: Letter of Gratitude

Dr. HM Mabaso

With overwhelming joy, we write this letter to thank you for reaching out to our humble school and assisting our learners with their formal assessment experiment.

Your young facilitators' dedication to helping our girls surpassed all our expectations as they not only facilitated the experiment but further taught and clarified some of the challenging aspects that our learners had with chemistry. Allowing our girls to touch and work with your instruments (apparatus) and chemicals gave them a realistic view of the science world that they aspire to become part of, moreover, it left them inspired to do better at their studies.

The burden of workload that faced our science teacher before you came was reduced significantly, thus allowing for more revision time for our matriculants.

As a school, we cannot thank you enough for your generosity, yet because of you our pass percentage projection for Physical Sciences has risen to a region of high nineties. Achieving this goal is our only way of showing gratitude to you and making you a proud partner of our school.

Thank you

**ALBINI HIGH SCHOOL**
